Objective

Results-driven Data Engineer with 3+ years of experience in **Python, SQL, PySpark, Hadoop, GCP, Azure, and Databricks**. Specialized in **ETL pipeline development, workflow automation, cloud-based data engineering**, and delivering scalable analytics solutions. Skilled in large-scale data processing, **query optimization**, and implementing **data lakehouse architectures**. Strong collaborator with excellent problem-solving abilities and a proven record of driving timely project delivery.

Skills

Languages : C, Python, SQL

Cloud Platforms : GCP (BigQuery, Cloud Storage), Azure (Data Factory, Databricks, Data Lake)

Tools & Frameworks : PySpark, Apache Spark (Spark Core, Spark SQL), Hadoop, Apache Airflow, Microsoft SQL Server, Excel

Key Competencies : Data Migration, Data Cleansing & Transformation, Workflow Orchestration, Cloud Data Engineering, SQL Query Optimization, Big Data Analytics

Soft Skills : Analytical Thinking, Communication, Collaboration, Problem Solving, Adaptability

Experience

Data Engineer, Infosys Ltd | Bengaluru

April 2022 – Present

- Led migration of legacy data pipelines from on-premise **Hadoop systems to Google Cloud Platform (GCP)**, ensuring seamless transitions and minimal downtime.
- Designed, developed, and automated **ETL (Extract, Transform, Load)** pipelines using **Apache Airflow** for workflow orchestration, resulting in **faster and more reliable data ingestion** processes.
- Performed data cleansing, transformation, and enrichment using **Python (NumPy, Pandas), PySpark, and SQL**, ensuring high-quality datasets ready for advanced analytics.
- Utilized **BigQuery for large-scale data processing**, complex querying, and optimization on multi-terabyte datasets, enabling faster reporting and business insights.
- Engineered a hybrid **Data Lakehouse** architecture by integrating **Azure Data Lake for scalable data storage, Azure Databricks** for distributed data processing.
- Collaborated with **cross-functional teams and clients** to gather data requirements and deliver customized data solutions within strict project timelines.
- Ensured adherence to **data security, compliance, and governance** best practices across all **data workflows, particularly for sensitive datasets**.
- Implemented secure, scalable cloud-based data storage and processing solutions using **Azure Data Lake and Databricks notebooks**, enabling **efficient big data analytics and advanced reporting**.

Education

Master of Computer Applications (MCA)

January 2023 - January 2025

I G N O U

Diploma in Computer Science

July 2018 - October 2021

Govt. Polytechnic College Kashipur

KEY COURSEWORK - Data Structures and Algorithm, Machine Learning, RDBMS(SQL), C Programming

Personal Projects

Stock Market Forecasting System

- Designed and implemented a solution to anticipate stock market trends using **Python, NumPy, Pandas, scikit-learn, and neural network-based frameworks**.
- Constructed a data-driven pipeline to handle historical stock data of over 50 companies, utilizing more than 100 technical metrics and indicators.
- Deployed advanced **time-series analysis techniques**, including ARIMA, LSTM networks, and regression algorithms to improve forecasting precision.

Audio Event Classification using Deep Learning

- Developed a comprehensive machine learning model for sound event identification and classification from various audio datasets.
- Extracted acoustic features using **MFCC (Mel-Frequency Cepstral Coefficients)** to convert variable-length audio inputs into consistent feature vectors.
- Architected and trained a deep learning model based on **Convolutional Neural Networks (CNNs)** to recognize and categorize audio into 10 distinct classes.
- Employed ensemble methods such as **voting schemes and threshold-based filtering** to enhance classification accuracy and robustness.

Certifications

Infosys Certified AWS Developer Associate	2023
Infosys Certified Database and SQL Professional	2023
Infosys Certified Cloud Beginner	2024
Infosys Certified Python Programmer	2025
NCC 'C' Certificate	2018
